

Steelpad S&S

Professional Gaming Mousepad

(steel series)
professional gaming gear

Product information

Product description

Steelpad S&S - by gamers, for gamers. This mousepad offers unprecedented control and accuracy allowing the user to perform minimal and extremely precise movements. The surface is made of a special responsive plastic compound and the back side features small soft rubber elements offering non-slippery steadiness. The highly durable surface obtains increasing durability and offers a consistent glide experience that only gets better over time. The mousepad comes with a cool nylon sleeve which offers protection for the pad during travelling and other transportation. The Steelpad S&S is compatible with all mice.

Special features

Highly durable surface. Unprecedented accuracy. Nylon sleeve for safe transportation.

Gaming insider notes

The Steelpad S&S has been developed in cooperation with the famous gaming organization SK-Gaming. It was over 1 year in development, and over 200 surfaces was tested. It is now seen by many gamers as the best mousepad ever made. In 2005 the Swedish "SK-Gaming" team won the CPL using Steelpad S&S, and 1 member of the US based CS team "Complexity" played on Steelpad S&S when they won the ESWC.

SK-Gaming: "Steelpad S&S is the best plastic mouse pad around, sweeping away all competition on the market. A strong surface and big size makes the pad perfect for all sensitivities. With or without padsurfers, the Steelpad S&S gives you the optimal surface for professional gaming"
